GXO Announces Accelerated Deployment of Adaptive Technology Solutions in the U.S.

November 18, 2026

Deployment of advanced automation technologies expected to enhance safety, productivity and operational agility across key industries

GREENWICH, Conn., Nov. 18, 2026 (GLOBE NEWSWIRE) -- GXO Logistics, Inc. (NYSE: GXO), the world's largest pure-play contract logistics provider, today announced the accelerated deployment of adaptive technologies across its U.S. footprint to improve operational performance and workforce efficiency for customers across a range of sectors, including consumer goods, food & beverage, omnichannel retail, aerospace & defense, and technology. The deployment will commence in early 2027 with a phased roll-out across priority sites over the following 12 months.

The deployment will include adaptive technologies tailored to address evolving operational needs, including pallet autonomous mobile robots (AMRs), robotic unload systems and wearable scanning solutions. Together, these technologies are intended to help streamline material movement, increase throughput, improve inventory accuracy and enhance workplace safety.

"Today's supply chains require solutions that are efficient and adaptable," said Michael Jacobs**,** CEO of the Americas & Asia Pacific, GXO. "This deployment underscores our commitment to helping customers modernize their operations with technologies that can deliver immediate value while positioning them for long-term growth. By leveraging advanced automation and vision-enabled solutions across multiple industries, we are enabling safer, smarter and more responsive operations across our footprint."

The multi-site deployment reflects growing customer demand for scalable automation solutions that can be integrated into existing workflows with minimal disruption. It is expected to drive measurable improvements in operational performance, helping sites increase efficiency, optimize labor resources and enhance service levels.

Among the technologies expected to be deployed:

- **Pallet AMRs** to automate repetitive material transport and improve warehouse and production flow.
- **Robotic arms** deployable across multiple applications including inbound unloading and packing solutions**.**
- **AI enabled vision technologies** to enable hands free data capture, improving productivity and inventory checks.
- Flexible and scalable **automated sortation systems**.

As businesses continue to navigate an increasingly dynamic environment, GXO remains focused on delivering proven technologies that empower customers to adapt faster, operate smarter and achieve sustainable growth.

About GXO
